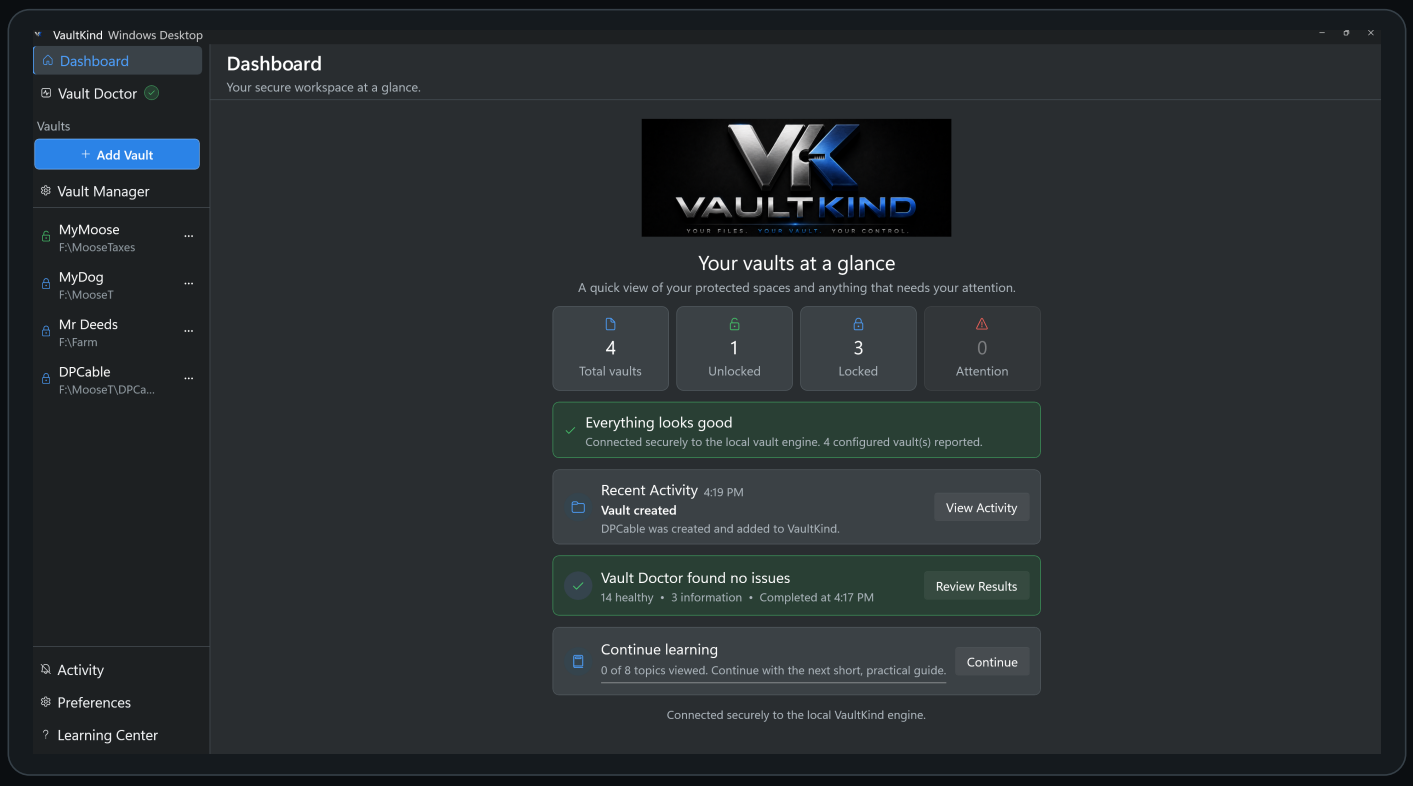
PRESS & MEDIA KIT

VaultKind

Built for people - not security experts.

VaultKind is a Windows desktop application for creating, opening, understanding and checking Cryptomator-compatible encrypted vaults. It brings a native WinUI workspace, local vault engine, Vault Doctor and built-in guidance into one application.



Dashboard: vault status, health, activity and guidance. Full-resolution PNG included.

Windows desktop / Local core operation / Cryptomator-compatible

Version 1.0.2 | Public production release | Free on Microsoft Store

Interface	**Native WinUI 3 desktop shell**
Core operation	**Local and offline by design**
Vault format	**Cryptomator-compatible**
Distribution	**Microsoft Store MSIX**
Price	**Free**
Source	**Public source**
License	**GNU GPL v3**
Language	**English only**
Independent security audit	**None**
Project home	**WebbiNetworks/VaultKind**

About this edition

Assembled October 9, 2026 from the approved VaultKind press page and its release information dated August 5, 2026. Online release notes provide subsequent version information.

INDEPENDENT PROJECT, COMPATIBLE FORMAT

Background and trust

VaultKind is derived from Cryptomator under GPLv3.

Cryptomator foundation

VaultKind retains Cryptomator-compatible vault handling and depends on Cryptomator libraries including cryptofs and cryptolib.

Windows focus

Webbi Networks focuses VaultKind on Windows and English, with a native WinUI shell, Learning Center, Vault Doctor, Store packaging and publisher presentation.

Cryptographic boundary

Security-sensitive code and Java package identifiers stay close to upstream where practical. The native frontend talks to the Java vault engine through a narrow local interface.

Audit status

VaultKind has no independent third-party security audit. Public source, Store certification and internal tests must not be presented as an independent security audit.

Product focus

Cryptomator	VaultKind
Official cross-platform app	Independent Windows-only app
Cross-platform interface	Native WinUI 3 Windows workspace
Documentation and community support	Built-in Learning Center and FAQ
General troubleshooting paths	Local, read-only Vault Doctor
Broad platform scope	Windows accessibility and Explorer integration

VaultKind is not affiliated with, endorsed by, or an official product of Skymatic GmbH or the Cryptomator project.

FAQ AND CONTACT

Reviewer questions

Is VaultKind available to install today?

Yes. Version 1.0.2 is a free, publicly discoverable Microsoft Store application for supported Windows 10 and 11 x64 systems.

Does VaultKind create its own vault format?

No. VaultKind works with Cryptomator-compatible vaults so users can keep the encrypted format they already trust.

Does VaultKind upload vaults for diagnostics?

No. Vault Doctor performs local, read-only checks. Using VaultKind does not require a VaultKind cloud service.

Who is VaultKind for?

People who want encrypted storage to feel like a normal Windows application rather than a technical project.

How should a reviewer request more information?

Use the private media contact form. Do not include vault passwords, recovery keys, private documents or sensitive personal information.

Online contact and research

The briefing and included images work offline. These destinations require an internet connection.

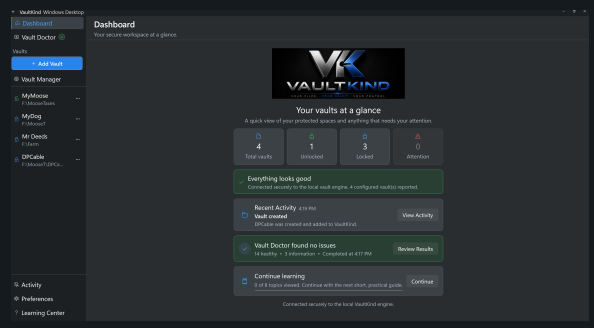
INCLUDED FULL-RESOLUTION SCREENSHOTS

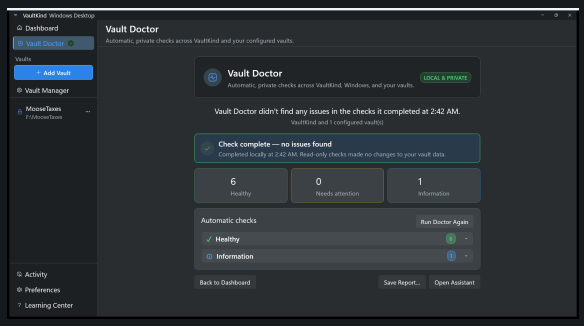
Five views of VaultKind

Dark-mode originals are in the screenshots folder. Use the PNGs for publication; these previews identify each image.



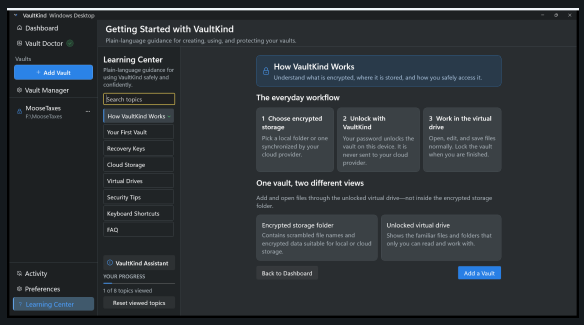
01 Dashboard

Vault status, health, activity and guidance.



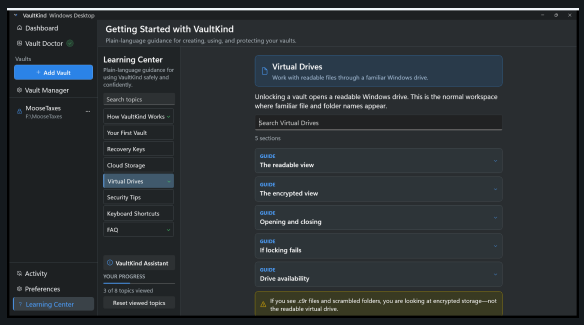
02 Vault Doctor

Private, read-only diagnostics.



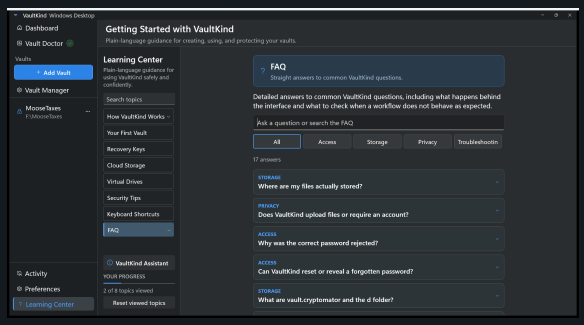
03 Learning Center

Guidance inside the application.



04 Virtual Drives

Learning Center guidance for working with virtual drives.



05 Searchable FAQ

Plain-language answers.

Original PNGs included

Open the screenshots folder for all five images at full resolution. The offline guide lists filenames, dimensions and captions you can copy.

No image editing or recoloring has been applied.

INCLUDED LOGO AND SOCIAL ASSETS

Approved brand artwork

Three original PNGs in the logos folder, ready for editorial coverage.

VK application mark

Square PNG for app, article and profile use.

512 x 512 pixels

vaultkind-icon.png

VaultKind lockup

Full product name with the approved VK mark.

968 x 368 pixels

vaultkind-lockup.png

Social preview

PNG for articles and link previews.

1200 x 630 pixels

vaultkind-social-v1-1200x630.png

Editorial use

These approved materials may be used in reviews, articles, videos, podcasts and other editorial coverage of VaultKind. Use logos without stretching, recoloring or adding effects. Keep the originals' proportions and artwork intact.
